

# Unit 1 · Lesson 1 evidence guide

Diagnostic, practice, speaking and homework · Source: Unit1 MS\_F.pdf + teacher-generated aligned items

**MARKING PRINCIPLE** The first 25 minutes are diagnostic and ungraded. Record independent / with cue / not yet. Do not convert this evidence into an IELTS or CEFR score.

## Diagnostic answers

| Item    | Answer                                                                                                         | Clue / observation                                                                               |
|---------|----------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| D06–D13 | get up; have breakfast; catch the bus;<br>study English; watch TV; go online; relax<br>with friends; go to bed | Accept spelling slips only if spoken form is<br>clear; record collocation control<br>separately. |
| D14     | She gets up at 6:30 every day.                                                                                 | Third-person singular → -s.                                                                      |
| D15     | He watches TV in the evening.                                                                                  | Verb ending -ch → -es.                                                                           |
| D16     | My sister tries to study after dinner.                                                                         | Consonant + y → -ies.                                                                            |
| D17     | I go to school by bus.                                                                                         | No be before a present-simple lexical<br>verb.                                                   |
| D18     | My brother is always tired after school.                                                                       | Frequency adverb follows be.                                                                     |
| D19     | Anna catches the bus at 7:15.                                                                                  | catch + noun; third person → catches.                                                            |

## Quick speaking evidence

| Feature                         | Independent              | With cue                 | Not yet                  | Exact evidence |
|---------------------------------|--------------------------|--------------------------|--------------------------|----------------|
| Answers in a complete<br>clause | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | _____          |
| Uses routine collocations       | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | _____          |
| Final sounds are audible        | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | _____          |
| Continues after a pause         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | _____          |

# Student practice · controlled work

Accepted alternatives are shown where meaning permits.

| Item | Answer               | Evidence / clue                              |
|------|----------------------|----------------------------------------------|
| P01  | My brother / studies | Subject is one person; consonant + y → -ies. |
| P02  | catches              | Ping = he; catch ends in -ch.                |
| P03  | study                | They takes the base form.                    |
| P04  | tries                | Nina = she; consonant + y → -ies.            |
| P05  | washes               | My dad = he; wash ends in -sh.               |
| P06  | Linh                 | cycles to school with her cousin             |
| P07  | Mateo                | catches a bus at 6:50                        |
| P08  | Mateo                | plays volleyball on the beach                |
| P09  | Sara                 | her father makes dinner and Sara washes up   |
| P10  | Linh                 | helps her grandmother prepare dinner         |

## P11 · Near transfer

Accept any two accurate comparisons that preserve meaning. Example: Mateo catches a bus, but I cycle to school. Linh studies after dinner, while I usually study before dinner.

# Repair, exit and feedback

Correct form + decisive clue; avoid awarding credit for guessing alone.

| Item | Answer                              | Reason                                                                     |
|------|-------------------------------------|----------------------------------------------------------------------------|
| P12  | My friend goes online after school. | My friend = he/she; go → goes.                                             |
| P13  | She studies English every evening.  | Consonant + y → -ies.                                                      |
| P14  | He is always late for class.        | Frequency adverb follows be.                                               |
| P15  | My dad does the cleaning on Sunday. | Fixed collocation: do the cleaning.                                        |
| P16  | watches                             | She + verb ending -ch → -es.                                               |
| P17  | I usually go online after school.   | Frequency adverb before most lexical verbs.                                |
| P18  | Accept a usable rule                | Must mention subject/person and a correct ending or adverb-placement clue. |

## Two-priority feedback

| Priority 1 · accuracy                                           | Priority 2 · communication                                   |
|-----------------------------------------------------------------|--------------------------------------------------------------|
| Choose one: subject–verb ending / adverb position / collocation | Choose one: sequence / clarity / reason / reduced hesitation |
| Evidence from attempt 1: _____                                  | Evidence from attempt 1: _____                               |
| Change in attempt 2: _____                                      | Change in attempt 2: _____                                   |

# Speaking and writing evidence

Use the same shared objectives; support changes, not the target.

## Speaking observation · U1-L1-O5

| Criterion        | Secure                    | Developing                         | Next move                                |
|------------------|---------------------------|------------------------------------|------------------------------------------|
| Routine language | 6+ accurate phrases       | 3–5 phrases or repeated misuse     | Retrieve collocations with category cues |
| Present simple   | Mostly reliable endings   | Errors obscure who does the action | Underline subject before the verb        |
| Organization     | Clear sequence + reason   | List-like or hard to follow        | Restore four-part keyword frame          |
| Delivery         | 60–90 sec; understandable | Very short / full-script reading   | Rehearse from six keywords               |
| Redo             | Visible improvement       | Same error pattern                 | Give one model and shorten the retry     |

## Homework evidence

- Content: 8–10 relevant sentences about a typical weekday.
- Language: 6 routine phrases, 3 frequency adverbs, mostly reliable present simple.
- Organization: sequencing words and a final preference/reason.
- Audio: 60–90 seconds from keywords, not a read-aloud of the paragraph.
- Metacognition: one uncertain sentence marked for discussion.

## Lesson 2 starting point

| Evidence from Lesson 1              | Start Lesson 2 with                                |
|-------------------------------------|----------------------------------------------------|
| Vocabulary below 6/10 independently | Six-item phrase retrieval + oral categorization    |
| Grammar below 7/10                  | Subject–verb sorting + completion problem          |
| Reading below 5/7                   | Question word → keyword → proof routine            |
| All core thresholds met             | Telling the time + far-transfer weekday comparison |

**RECORD** Next review: 48–72 hours. Keep exact examples of errors and successful self-corrections; avoid general labels such as weak or careless.
