

Unit 1 · My Daily Routine

Lesson 1 · Diagnostic + teaching · 105 minutes · Online 1-to-1 · English–Vietnamese

SUCCESS EVIDENCE By the end, the learner can use at least 8 routine phrases, solve 5/7 reading details, form 8/10 present-simple sentences correctly, and speak for 60–90 seconds before and after feedback.

Objectives

- U1-L1-O1 · Establish a baseline in vocabulary, grammar, pronunciation and connected speaking.
- U1-L1-O2 · Understand and use everyday-routine collocations.
- U1-L1-O3 · Skim and scan short profiles, then point to evidence.
- U1-L1-O4 · Apply present-simple subject–verb agreement and frequency-adverb placement.
- U1-L1-O5 · Give and improve a 60–90 second talk about an average day.

Ready before the learner joins

- Open Unit1 MS_F.pdf at pages 1–4; prepare screen sharing, camera, microphone and timer.
- Keep the diagnostic sheet and observation grid open, but do not teach or correct during the baseline sample.
- Prepare a shared board with three zones: ROUTINES · CLUES · MY DAY.
- Tell the learner: This first check is not a grade; it helps us choose what to practise.

WATCH FOR I gets up; she get up; he watch; I am go; always after be vs before most verbs; catch/go the bus; do/make dinner.

Minute-by-minute control surface

Keep the diagnostic clean; teach only after minute 30.

Stage	Min	Teacher move	Student evidence
Launch	5	Set success criteria. Ask: What do you usually do before school?	One spontaneous answer; willingness to speak.
Vocabulary baseline	12	Show routine prompts. Ask for phrase, sentence and pronunciation. No correction yet.	Independent recall vs recognition; final sounds.
Grammar + speaking baseline	13	Use six wrong sentences and a 30-second day prompt. Record exact errors.	Error detection, reason, self-correction, fluency.
Build vocabulary	10	Group phrases by morning / school / evening. Model collocations, then fade word bank.	8/10 phrases used in a personal sentence.
Read for evidence	15	Use textbook profiles: skim for person/place, scan for time/action, underline proof.	At least 5/7 details plus a text clue.
Notice the rule	15	Contrast I get / she gets; watch / watches; try / tries; place always/usually.	Learner states a usable rule and tests it.
Controlled practice	10	Set ten items. Check in clusters of three; ask Which clue forced your choice?	8/10 correct or clear recovery after cue.
Guided speaking	10	Plan keywords only; compare learner with one profile using but / after that.	Six routines + two frequency adverbs.
Speak → feedback → redo	10	Time 60–90 seconds. Give one grammar and one communication priority, then repeat.	Second attempt is measurably clearer or more accurate.
Exit + next step	5	Three-item exit check; assign writing and audio homework.	Concrete next action based on evidence.

Board plan and decision cues

Minimal writing; visible clues; support fades as evidence improves.

Board plan

ROUTINES	CLUES	MY DAY
get up · have breakfast catch the bus · study go online · go to bed	I/you/we/they → base he/she/it → -s/-es/-ies always before most verbs	First... After that... I usually... What I enjoy most is...

Hinge questions

- Which is correct: She studies / She studys? What happens to consonant + y?
- Where does usually go in He ____ watches TV? What changes with the verb be?
- Which phrase is a collocation: catch the bus / catch to the bus / go the bus?
- Can you point to the exact words in the reading that prove your answer?

Smallest useful response

Evidence	Teacher move	Do not do
Cannot recall phrase	Give first word or category; ask again after two items.	Immediately provide the full sentence.
Knows rule, misses ending	Underline subject; ask: one person or more?	Re-teach every present-simple rule.
Speaking overload	Allow six keywords and 30 seconds planning.	Let the learner read a full script.
Quick mastery	Remove word bank; require comparison and a follow-up question.	Add unrelated grammar.

TRANSITION At minute 30 say: I have enough evidence. Now we will use the clues to make your English more reliable.

TEACHER ONLY · EVIDENCE

Observation and follow-up

Use evidence to choose the next lesson, not to assign an IELTS band.

Live observation snapshot

Domain	Independent	With cue	Not yet	Evidence note
Routine collocations	☐	☐	☐	_____
Third-person forms	☐	☐	☐	_____
Adverb placement	☐	☐	☐	_____
Reading evidence	☐	☐	☐	_____
60–90 sec speaking	☐	☐	☐	_____
Self-correction	☐	☐	☐	_____

Decision after the lesson

- If vocabulary < 6/10 independently: retrieve the same phrases next lesson before adding time expressions.
- If grammar < 7/10: begin Lesson 2 with subject–verb sorting and a completion problem.
- If reading < 5/7: teach question-word → keyword → evidence before longer texts.
- If redo improves: keep feedback to two priorities. If not, restore one scaffold and repeat a shorter talk.

Spaced retrieval

- Within 48–72 hours: six-item mixed retrieval quiz.
- One week later: describe a different weekday without the model.
- Two weeks later: compare school-day and weekend routines using evidence-rich sentences.

TEACHER NOTE The learner's estimated IELTS 3.0–3.5 is background context only. This lesson does not generate a certified CEFR or IELTS result.
